

## WARNING RADIANT HEATERS

Any piece of equipment can be dangerous if not operated properly. **YOU** are responsible for the safe operation of this equipment. The operator must carefully read and follow any warnings, safety signs and instructions provided with or located on the equipment. Do not remove, defeat, deface or render inoperable any of the safety devices or warnings on this equipment. If any safety devices or warnings have been removed, defeated, defaced or rendered inoperable, **DO NOT USE THIS EQUIPMENT!!!**

### **THIS HEATER REQUIRES PROPANE FUEL ONLY!!**

**DANGER:** This heater consumes large amounts of oxygen. Use only in well ventilated areas. Not for residential heating. For jobsite use only!

**DANGER:** This heater gets **Extremely Hot**. Never touch it while it is operating and always let it cool down completely before moving or transporting.

Propane itself is not a listed Proposition 65 chemical.

BUT

**⚠ WARNING:** The combustion of propane in appliances, such as stoves or heating systems and vehicles using propane, creates harmful chemicals. These chemicals include carbon monoxide, benzene, formaldehyde, and acetaldehyde - all chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. You should read and follow all use, care, and manufacturer instructions for propane appliances and equipment. Proper ventilation and frequent inspection of propane appliances and equipment are highly recommended. A warning odorant is added to propane so that leaks of unburned gas can be quickly detected. If a gas odor is detected, contact a qualified service technician immediately.

- **Propane gas is odorless. An odor-making agent is added to propane to help you detect a gas leak. However, the odor added to propane gas can fade. Propane gas may be present even though no odor exists.**
- **Propane gas is heavier than air. If propane leaks from a hose, connection or fitting, it sinks to the floor collecting there with the surrounding air, forming a potentially explosive mixture.**

### **IMPORTANT SAFETY RULES TO FOLLOW**

1. Smoking is not permitted while handling or transporting propane tanks. Keep open flames or other ignition sources away from tanks. Do not direct heat towards tank.
2. Tanks must be transported in open spaces of the vehicle's trunk or bed in an upright position. Never leave or store the tank in the trunk
3. Tanks must be securely lashed in an upright position to minimize the possibility of tipping or rolling.
4. When transporting propane tanks, the safety plug must always be securely attached unless it is an ODP valve.
5. Check hose for damage and test all connections for leaks, never test with flame, use soapsuds solution. Never attempt to repair or splice LP gas hose.
6. Do not operate this heater unattended.
7. Do not modify the heater or operate a heater, which has been modified from its original condition.
8. Use only vapor withdrawal LP cylinders. Mount cylinders vertically (shut-off valve up) and secure them from falling.
9. Locate additional LP cylinders at least 7 ft from the heater sides and rear. Never direct the heater toward other cylinders.
10. City Codes designate this type of heater for construction use only. Use in well ventilated area.
11. Use only in areas free from flammable vapor or high dust content. Never use where gasoline, paint thinner, or other flammable vapors are present.
12. Operate only on a level surface.
13. Do not use with ductwork. Do not restrict inlet or exit areas.
14. Do not move, handle or service while hot or running.
15. Never store Propane Tanks indoors or in an enclosed area!
16. Never transport Propane Tanks in the passenger area of any vehicle!
17. Maintain minimum clearance from normal combustible materials as follows:

<b>Floor</b>	<b>0ft.</b>	<b>Sides</b>	<b>6ft.</b>	<b>Top</b>	<b>6ft</b>
--------------	-------------	--------------	-------------	------------	------------

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator. **IF** there is any doubt as to the operation or safety of the equipment,

**DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!!**

**FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN INJURY OR DEATH**
